

Lecturer's name:		Date:				
Course: World Geography		Duration:				
Unit:		TEKS:				
	• WG.6:	• WG.6A	• WG.6A	• WG.6B	Wh 7.a	• WG.7A
Lesson objectives:	By the end of the lesson, students will be able to describe the types, patterns, and processes of settlement. Students will use this information to create a presentation explaining why and how people settled in a region of their choosing.	By the end of the lesson, students will be able to locate and describe the human features that influence the size and distribution of settlements. Students will use this information to create a presentation explaining why and how people settled in a region of their choosing.	By the end of the lesson, students will be able to locate and describe the physical features that influence the size and distribution of settlements. Students will use this information to create a presentation explaining why and how people settled in a region of their choosing.	By the end of the lesson, students will be able to explain the processes that have caused changes in settlement patterns, including urbanization, transportation, access to and availability of resources, and economic activities. Students will use this information to create a presentation explaining why and how people settled in a region of their choosing.	By the end of the lesson, students will be able to analyze population pyramids. Students will use this information to create a presentation explaining why and how people settled in a region of their choosing.	By the end of the lesson, students will be able to use data, graphics, and maps to describe the population characteristics of different societies and to predict future population trends Students will use this information to create a presentation explaining why and how people settled in a region of their choosing.
Essential Questions:	Essential Questions: What are the types of settlements? What are the patterns of settlement? What are the processes of settlements?	Essential Questions: What are the human features that influence the size of settlements? What are the human features that influence	Essential Questions: What are the physical features that influence the size and distribution of settlements?	Essential Questions: What causes changes in settlement patterns?	Essential Questions: What is a population pyramid? How do professionals use population pyramids?	Essential Questions: How do professionals use data, graphics, and maps to describe the population characteristics of different societies?

		the distribution of settlements?				How do professionals and to predict future population trends?
LYS Methodology Be (Character/Values/Principles) - Know (What resources are available to the student / How can they use them) - Do (Execute with Excellence) -	Be: What are some ways you can hold onto hope? Know: What are some simple ways to help keep your health in balance? Do: How can you increase your professionalism at work?	Be: What are some ways that you can improve your empathy? Know: What are simple ways you can determine the material value of something? Do: How can you use your spirituality to help you find meaning in your life?	Be: What does it mean to be disciplined at work? Know: What types of degrees will you need in order to obtain a job in the careers you are interested in pursuing? Do: how can you help others become more trusting?	Be: What do you think it means to be assertive when developing healthy habits? Know: What are some simple chants you can incorporate into your life? Do: How can you improve your time management?	Be: What are some non-traditional ways of developing educational competence? Know: What are some easy ways you can connect with someone? Do: How can you use your educational skills outside of the classroom?	Be: What is thriftiness? Know: What are some easy ways you can develop workplace ethics? Do: How can you use your spirituality to build self confidence?

Instructional Input - Asynchronous AS: Anticipatory Set (Introduction) M: Modeling (I do) GP: Guided Practice (We do)	Instructional Input - Asynchronous AS: Anticipatory Set (Introduction) Students will write a few sentences, up to a paragraph, on what they think are the types, patterns, and processes of settlement. Students will upload their answers to the LMS. M: Modeling (I do) Students will watch a video on the types, patterns, and processes of settlements. After the video, have the students discuss with a partner what they think the types, pattern, and process for the settlement of their town, county, and state was. Have the students share their theories with the class. GP: Guided Practice (We do) Have students pick a non-North American city and inform students that they will put together a presentation discussing how their chosen city (as well as the country their city is located in) was settled. For this class, students will research the type, pattern, and process of settlement for their chosen city.	Instructional Input - Asynchronous AS: Anticipatory Set (Introduction) Students will write a few sentences, up to a paragraph, on what they think are the human features that influence the size and distribution of settlements of the city of their choosing. Students will upload their answers to the LMS. M: Modeling (I do) Students will watch a video on the human features that influence the size and distribution of settlements. Lesson Close	Spiritual	Social	Vocational	Health	Spiritual	Financial
What is the answer to the essential question, and why does it matter to me in terms of: Educational? Social? Cultural? Financial? Health? Vocational? Spiritual?	All of us will face trials and tribulations in our lives.	Empathy, which consists of being able to understand the feelings of someone else, is not easy for everybody. Some of us struggle with empathy and others are naturally empathetic.	In school, you will learn a wide variety of skills, many of which you will utilize in the workplace. Sailors and pilots, for example, frequently rely on latitude and longitude. However, some of the skills that you need in order to succeed in the workforce, such as a sense of discipline, can not be learned from an academic lesson. What does it mean to be disciplined at work?	Monitoring your health and maintaining healthy habits takes time to develop. However, an important healthy habit is being assertive about your own health needs. What does it mean to be assertive about your health?	All of us will face trials and tribulations in our lives. When we face difficult times, especially ones that might be traumatic, it is important to hold onto hope- the belief that things will get better. What are some ways you can hold onto hope?	As you go through life you will learn a variety of financial skills. One of the most important skills you will learn is how to be thrifty. What is thriftiness?
	Health An important aspect of maintaining good health is keeping your health in balance- having too many or not enough healthy habits can actually have serious repercussions for your health. Knowing how important it is to keep your health in balance, what are some simple ways to help keep your health in balance?	Financial Many people make a living by selling products online through personal stores such as Etsy. When you buy goods and services from stores such as this, it is important that you know the material value of a good in order to prevent yourself from being overcharged. What are simple ways you can determine the material value of something?	Educational For every vocation out there, there is a degree. The type of job you want will determine the type of degree that you need. However, for most jobs you will need either an Associate's degree or a Bachelor's degree. Think about the types of careers that you are interested in, what types of degrees will you need in order to obtain a job in your chosen vocation?	Spiritual Prayers and chants are utilized by pretty much every faith on Earth. If you are not religious, that doesn't mean that you can't use chants to improve your life. A chant can be as simple as "so it goes" or as complex as a prayer. What are some simple chants you can incorporate into your life?	Health An important aspect of maintaining good health is keeping your health in balance- having too many or not enough healthy habits can actually have serious repercussions for your health. Knowing how important it is to keep your health in balance, what are some simple ways to help keep your health in balance?	Vocational Workplace ethics or not chart and every career field some of them are in special classes. However, many people utilize their own ethics when working in their chosen vacation. Knowing that workplace ethics are not always taught, what are some easy ways you can develop workplace ethics?
	Vocational Professionalism is defined as the competence or skill expected of a professional. What this means is that as you develop skills and in education, your coworkers and customers will expect your ability to do your job to increase. For example, if you are a doctor you'll be expected to be able to do basic medical procedures, such as taking blood pressure. However, as you go through a medical career, as a professional, you will be expected to be able to do more and more complex tasks. Regardless of your career choice or where you start off, your professionalism is directly tied into using the skills and education required of		Social	Financial Some people say that time equals money. When many people think of financial skills they might think of budgeting or how to turn their money into		Spiritual Self-confidence is not easy for everybody to come by and everybody goes through periods where they lack self-confidence. People develop their self confidence through a wide variety of methods including your spirituality. How can you use your spirituality to build self confidence?

	someone with your level of experience. How can you increase your professionalism at work?,	One of the great mysteries of life is wondering why we are here and what is the meaning of our lives. In order to seek answers for these questions, people rely on a wide variety of sources, including their spirituality. How can you use your spirituality to help you find meaning in your life?	Trust is not easy for everybody. Some people are more naturally trusting and others might have trouble trusting others. trust people more easily, how can you help people who are less trusting of others rebuild their trust in others??	more money. Many people tend to overlook the role that time management plays in making money. If you think if you are in a job where time management determines how much money you make, time management becomes that much more important of a skill. How can you improve your time management?	and in education, your coworkers and customers will expect your ability to do your job to increase. For example, if you are a doctor you'll be expected to be able to do basic medical procedures, such as taking blood pressure. However, as you go through a medical career, as a professional, you will be expected to be able to do more and more complex tasks. Regardless of your career choice or where you start off, your professionalism is directly tied into using the skills and education required of someone with your level of experience. How can you increase your professionalism at work?,
